reasons to choose BPI

A referral practice dedicated to excellence

Our dentists are registered specialists with years of experience. All staff keep up to date by engaging with continuing professional development.

Specialists work exclusively at this practice

Appointments can be made at your convenience and you will have no waiting times. Our specialists can care for you five days a week.

Established in the Midlands for over 15 years

You can be certain to receive a range of dental treatments to improve and preserve your smile. Our excellent reputation is well known, we have a large referring base of dentists nationwide.

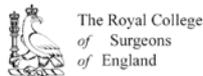

One of the leading practices in the UK

As well as having state of the art equipment and facilities, we are also a major provider of professional training programmes for other dentists.

“ Boota is an extremely skilled practitioner. Leading a select team of experts devoted to delivering excellence in periodontics, implantology and advanced restorative dentistry. He has a reputation for routinely surpassing patient’s expectations. ”

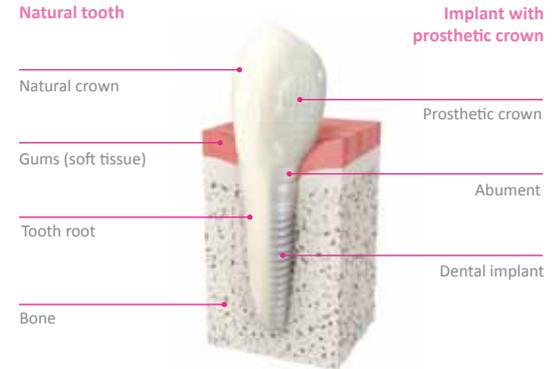

Dr BS Ubhi (Principal)
BDS, MDentSci, MRDRCs (Eng)
Registered Specialist in Periodontics

dental implant therapy

A dental implant is an artificial tooth root placed where the missing tooth used to be. They are made of solid, sterile titanium which is inserted into the jaw to replace the roots of natural teeth. On the top of these implants can be placed fixed crown or bridgework or even a removable denture.

- ✓ Provide a strong and stable foundation for replacement teeth, which look, feel and function just like natural teeth.
- ✓ Replace missing teeth while preserving the condition of healthy adjacent teeth.
- ✓ Stimulate bone and gum tissue to provide an attractive and aesthetic smile over time.
- ✓ You can eat and speak with new confidence.

“ Having implants has transformed my life, I look younger and am much more confident. I can't praise the team enough; it was unbelievably quick and painless. In fact I have had fillings more painful! ”
JH, Sutton Coldfield

teeth in a day

If you have lost all your teeth, traditional dentures are a solution which often has limited success. Dentures may become painful and inconvenient; they can make chewing foods difficult, affect your speech and overall quality of life.

The All-on-4 treatment replaces your missing teeth with a full dental bridge supported by only four to six dental implants. With fewer implants needed, overall treatment time is reduced and most patients do not require a bone grafting procedure.

Replace your old denture completely, in just one day; you will have a beautiful smile and a full set of functional teeth supported by a state of the art implant system.

Cheaper than conventional implants: All on four is offered at a fixed cost which includes all consultations, radiographs, CT scan, implants and fixed bridgework.

nobel biocare all on 4 implant system

Eat the foods you enjoy and smile with confidence!

Fewer implants – Only four to six rather than eight per arch

Far lower cost – Less appointments and time off work

Same day teeth – Walk away with new smile and restored confidence

Immediate function – You can eat immediately after the procedure

Predictable aesthetics – Restore your smile, no denture adjustments

Avoid the need for bone grafting – Don't wait for 6-12 months for implants

periodontal therapy (gum therapy)

Periodontal disease (or gum disease) is an infection of the underlying support structures of the teeth caused by bacteria in the mouth. The infections destroy the foundation, the gum and bone around your teeth, causing your teeth to loosen and fall out.

The good news is the earlier it's treated the more successful the results. Healthy gums free from infection will bring you benefits everyday:

- ✓ Fresh breath
- ✓ Be pain free
- ✓ Chew food more confidently and easily
- ✓ Help preserve your natural teeth for a lifetime

The solution we recommend will depend on your individual condition, our goal is always to return you to good oral health and then to help you to maintain it.

infected gums

healthy cured gums

“ By listening to your questions and concerns regarding your dental health, we are caring and skilled to provide the best solutions. ”

You will receive individual advice, tailored to guide you in the best approach to good dental health and hygiene. We take time to fully discuss the options available for any treatment you may require.

Our aim is to make your visits with our team as pleasant as possible. We understand how each patient's comfort is an integral part of top quality dental care.

periodontal medicine

Infections in the mouth can cause health problems in other parts of the body. Over the last 25 years substantial scientific evidence has emerged from the medical community linking periodontal disease to a number of systemic illnesses such as:

- Respiratory disease
- Heart disease
- Diabetes
- Stroke

By having periodontal therapy you are also reducing your risk for these diseases.

severely infected gums

healthy cured gums

This young man presented with severe gum disease. He had very swollen gums with a lot of bleeding. He had a course of gum therapy over 3 appointments. His bleeding had completely stopped and the swelling had gone down enormously. His mouth was much fresher, and he felt that his overall health had improved.

cosmetic and restorative dentistry

The principles of cosmetic dentistry are to create a natural, long lasting smile which is in harmony with your oral and facial features. We have over 40 years of combined experience in the field of cosmetic and restorative dentistry, with different specialists we are able to provide comprehensive care for all your dental needs.

The term cosmetic dentistry is used to encompass all the disciplines of dentistry such as:

- *Bridgework*
- *Orthodontics*
- *Dental implants*
- *Tooth whitening*
- *Cosmetic dentures*
- *Composite white fillings*
- *Porcelain veneers/crowns*
- *Periodontal plastic gum therapy*

Restorative dentistry improves the appearance and function of a person's teeth.

making our patients smile!

Correcting a crooked smile

This young patient had undiagnosed severe gum problems and was unhappy with her crooked smile. Fortunately we were able to stabilise her severe gum disease following periodontal (gum) therapy. After orthodontic therapy to correct her crowded teeth, some gum repositioning was carried out to create an even gum line. Finally after tooth whitening, two porcelain veneers were placed on her front teeth. The result is a long lasting smile which she is extremely happy with.

Treatments : *Periodontal Therapy, Orthodontics, Tooth Whitening and Veneers.*

Crowns transform smile

This gentleman was very embarrassed with his smile and teeth. Uneven gum line along with mis-matching crowns contributed to his concerns. After having his piercing removed we embarked on comprehensive plan starting with periodontal therapy. Following some gum recontouring on his upper teeth, all porcelain crowns were constructed which dramatically transformed his smile. His confidence has soared and he is much happier now.

Treatments : *Periodontal Therapy, Gum Recontouring and Porcelain Crowns.*

your first visit

On your first visit we will complete a thorough dental examination including dental x-rays and a medical and dental history. If your case is more advanced we may take a CT scan; we have this facility at the practice.

We will then discuss all the options for improving your gums and smile. If you have been referred by your own dentist, a full written report will be sent to both you and your dentist. The patient report will include fees and an appointment schedule should you wish to go ahead.

practice policies

Missed appointments

We require 48 hours notice if you are unable to keep an appointment. This will enable us to reallocate the time to care for another patient. A charge will be made for missed appointments or late cancellations.

Finance

Credit facilities are available should you wish to spread payments over time. Interest-free and low cost loans can be a much more affordable alternative to credit cards or bank loans. A loan is easy to apply for and simple to repay by Direct Debit. All finance options are provided by leading credit suppliers and are subject to status. Please ask to speak to the practice manager if you would like to discuss any of these options.

Payments

A deposit will be required for all treatments and payments are due at the time of the appointment.

Complaints

In this practice we take complaints very seriously indeed because we aim to provide every patient with a positive experience. Should a complaint arise, this is dealt with courteously and promptly so the matter can be resolved quickly and satisfactorily. Please ask to speak to the practice manager if you have any issues, concerns or suggestions as to how we could improve our service to patients.

Equality and diversity

If you have an particular need please contact us to see if we can help you.
